WALLER MAY BE ABANDONED.

Efforts Being Made to Have the Ex-Consul

Left to His Fate-May Not Succeed. Washington, June 12.—(Special.) Ex-Cor-ul Waller, of Kansas, new serving a terl. f twenty-one years in prison in France, in great danger of being abandoned by his government, or at least by the of-icials of the state department. It is said hat certain papers have been received. howing conclusively" that Mr. Waller ar to overthrow French authority, beother things that took him far be-the reach of the government of the nited States, and the result will doubtless

United States, and the result will doubtless be that Waller will have to work out his own salvation.

This announcement comes logically enough in view of former developments of the case in the department. This was the burden of the song when the case first came to light. It continued so until Secretary Gresham received a letter from an old time friend in Topeka, who stated that he knew Waller and knew him to be all right and a respectable citizen, and that the people of Kansas would like to see the department of state look into his troubles and prevent injustice being done him. This letter induced Mr. Gresham to begin the official inquiry into the case.

Since there is a change in the head of the state department, the official who has charge of this class of business has received information showing there is nothing in the case for the United States to complain about, while before his inquition prompted a similar announcement.

This official is from Virginia, and it is said that he frequently dines with a prominent attache of the French legation. There is also reason for believing that the information referred to comes from Wetter, consult at Madagascar, who is said to be on very friendly terms with the French. The rubber concession which Waller had secured leading to his troubles is supposed to be very valuable, hence there is some money involved, which may be used at the right time to create an impression in certain quarters that Waller his in the wrong and should remain in prison, while the French work his concession for all there is in it. French work his concession for all there is in it.

An effort is now being made to prejudice Mr. Olney against Waller and it remains to be seen whether or no it succeeds.

The Sult Grows Out of an Editorial Printed in Hudson's Paper June 2, Wherein Judge Foster Was Reflected Upon In Very Severe Terms-The Complaint.

party lash have thwarted the will of the people for twenty years. Public plander a venal press, and 10,000 banks have dome mated the conventions of all parties since secured in the conventions of both the old parties, and a multiplicity of issues bars the success of the Populists. What are the success of the Popullists. What are the party names without party principles? What is the Democratic party when it repulliates Jefferson and Jackson and fol-lows John Sherman? The Democratic masses are in favor of restoring the money of the constitution. They are speaking out in every state, and their voice is heard with dread by the enemies of the republic. A very large percentage of the Repub-hean masses are equally true to the prinwho worship at the shrine of gold monopoly, are more numerous and powerful than the Democratic leaders who work with them to maintain the gold standard,

ican people have been betrayed with a kiss for the last time. They now know that every man who qualifies his deter-mination to fight for the free and unlim-ited coinage of silver at the ratio of 16 to 1 by the United States alone is an enemy of the cause. All we demand is the 16 to of the cause. All we demand is the 16 to 1 statutes of 1834 and 1837. There were no 'lfs' and 'ands' about those statutes. There are none in the creed of a true bimetallist. The advocates of free coining at 15 to 1 by the United States alone comprise three-fourths of the voters of the United States. The only hope for gold monepoly is to divide and conquer. They have played that game for the last time. The hearts of the people are in a common cause, pro-duced by a common calamity. Whatever politicians and timeservers may do, the duced by a common calamity. Whatever politicians and timeservers may do, the South and West and all lovers of free institutions everywhere will come together and rescue this government from the rule of the gold kings. The policy of the enemy to impoverish the masses is now well understood. It is well known that opportunities create independence and manhood; that want of opportunities creates powerty and cowards. One more gold president might do the work and destroy the foundation of republican institutions, which is independence and presperity of the people. Thanks to Mr. Cleveland, the purposes of the enemy are disclosed. If the people submit to financial bondage and lose their liberty, they will have been warned in time. The gold standard, falling prices and hard times are as much the policy of Sherman, Harrison and the great mass of the leading Republicans as it is of Cleveland limeself. The only difference is, that Cleveland proclaims openly what the hypocrites do secretly.

The object leasons of the last three years show that the American people are face to face with concentrated capital, the enemy which destroyed all previous civilizations. A shrinking volume of money as compared with population and business produces failing prices, paralyzes industry and compels the producers of wealth to pawn their property to continue the struggle against impending fate.

The modern Colossus, the Rothschilds combination, is the greatest brokerage establishment the world has ever seen. It deals with corporations and nations which force from the people their camings either by monopoliting the necessaries of life or through the sovereign power of taxation. It furnishes money for its customers by selling their honds to the public for vasily more than the cost to the combination. The vast bonded debts of the United States and Europe have passed through their bands for nearly a century and the increment retained by the Rothschilds alone, independent of their numerous associates, South and West and all lovers of free

Shipments of Gold.

Gold of the World is Cornered.

What further proof is required than this outract to demonstrate that the gold of he world is cornered? A banking corporation contracts to change the currents of sternational commerce and agrees that o gold shall be shipped from the United tates for a period of eight months. How would the Rothenhilds combination perform uch a contract and stree the shipment of old from America to Europe unless they ad control of the gold? The goldites reclaim that the people of this country re entitled to the best money with the realiest purchasing power of any money in the world. What right have the people of the gold which the combination owns and controls? The people now know where he gold is which they are told is the only once they can have. old is which they are told is the only they can have bong as the standard money of the right would be in the hands of this all pool, just so long will the puring power of gold increase and the of property decline. Great as are merican people, unlimited as are the all resources of this country, prosperiment come within a larger circulational team gold alone. The basis of realism the following the first medium cannot be increased the latter than gold alone. The basis of realisting medium cannot be increased that metals would not be too and besides, the output of gold is intally consumed in the arts. The see of population and business is unity drawing the cords of contracienter and tighter around the limbs

"It is a foregone conclusion, fellow citizens," said the speaker, "that these gentlemen will so into the Republican party.

"They say the silver movement is run by politicians, but when I hook over the leaders of the gold burs I find men who were in politics when I was an infant. These people keep me constantly perturbed. I can hardly sleep at high now for worrying about my gold. I am afraid it will go abroad, I tell you, my friends, you can not keep too close a watch on your gold. It is liable to leave the country at any minute. President Cleveland has received a great deal of praise for his backbone. Let us disabuse his minut of the belief that there is any corner in backbone. The American people have a little and they're going to show it."

The private kept the audience laughing for about fifteen minutes and at the conclusion of his remarks, the convention took a recess until 2.39.

Immediately after the convention was called to order for the afternoon session, Senator J. K. Jones, of Arkansas, as chairman, presented the reports of the committee on resolutions, which he read as follows:

money of history and of the constitution.

The universal experience of mankind has demonstrated that the joint use of both silver and gold coin as one money constitutes the most stable standard of values and that the full amount of both metals is necessary as a medium of exchange.

The demonetization of either of these historic money metals means an appreciation from the value of money, a fall in the prices of commodities, a diminution of the profits of legitimate business, a continuing increase in the burden of debts, a withdrawal of money from the channels of trade and industry, where it no longer yields a safe and sure return and its ide accumulation in the banks and in the great money centers of the country.

There is no health or soundness in a financial system under which a hoarded dollar is productive of increase to its possessor while an invested dollar yields a constantly diminishing return and under which fortunes are made by the accretions of idle capital or destroyed by a persistent fall in the price of commodities and a persistent awindling in the margin of profits in almost every branch of useful industry. Such a system is premium upon sloth and a penalty upon industry, and such a system is premium upon sloth and a penalty upon industry, and such a system is that wished the criminal legislation of 1873 imposed upon this country.

The bimetallists standard of sliver and gold has behind it the experience of ages
